IN BUSINESS
ALL THINGS ARE
CONNECTED

WIRING
THE WORLD

A. & H. Meyer is an international cable management company with a global presence, and a client list that includes blue chip corporations and renowned furniture manufacturers.

Since our inception in 1961, we have established a corporate philosophy governed by five principles: Quality and Safety; Client Satisfaction; International Orientation; Constant Innovation and Maximum Preservation of the Environment.

A. & H. Meyer considers itself to be a partner for furniture providers who integrate electricity into furniture. Be it in small or large quantities, with special requirements or standard configurations, A. & H. Meyer is there for you. Excellent service, on-time delivery and excellent quality are our prime focus.

Naturally, all our products are manufactured in accordance with the relevant international electrical and safety standards and meet the quality requirements of ISO 9001 certification.

YOU BUILD IT,
WE'LL WIRE IT

A. & H. Meyer is a leading manufacturer of cable management systems. Our company fabricates one of the most diverse product ranges of electrification concepts in the world, which means we are able to provide customized solutions for all your power, data and multimedia requirements.

Our signature system is known as NETCONCEPT International, which are modular, self-contained, flexible and easy to install. The system comprises five product families.

NETBOX is the product solution that encases your system needs. The NETBOX range offers different types of applications according to your preferences: desktop, built-in, surface-mounted or concealed.

NETMODULE refers to the configuration of the NETBOX range from over 250 modules. From simple power outlets to data, multimedia, switches and many other features.

NETCONNECT conforms to the latest global safety standards and offers an internationally-accepted range of electricity, data and audio/video cable solutions as well as connectors.

NETSYSTEM allows our customers to control the flow of power in any given setting through a power distribution network thanks to our extensive selection of reliable modular distribution Boxes.

NET+ provides easy and practical solutions for any workstation with its wide selection of accessories and options.

OFFICE

Given that we spend so much time at work, functionality plays a crucial role in transforming workspaces into places of workplace well-being. Our products combine functionality with a unique design that adapts to individual office equipment. From practical hacks that seamlessly deliver electricity and make cables discreetly disappear to customized electrification systems that meet all data requirements, A. & H. Meyer elevates the connectivity experience in the modern workplace.

HOTEL & LOUNGE

Whether waiting in the cushy confines of a hotel lobby or office building, enjoying a moment of relaxation at a recreation area or even winding down in the familiar comfort of your own living room, a lounge with comfortable furniture is crucial in creating a cosy atmosphere for informal communication. To optimize the connectivity experience in this special zone, A. & H. Meyer has developed practical and innovative electrification concepts and products: power and data connections at your fingertips, and peace of mind and comfort to boot.

SHOPFITTING

Contemporary displays and shelving of shops, showrooms and booths require not only precision work and aesthetic appeal but also functional versatility. At A. & H. Meyer, our smart electrification solutions can be customized to meet virtually any application requirement for both retail and showroom concepts. Suitable for lightweight walls and installed partly tool-free, our vast selection of exciting offerings are designed to ensure secure and space-saving connectivity.

Shelf Systems

CONFERENCE

Atmosphere plays an important role in the conference room, being the integral part of a corporate office or hotel wherein important matters are discussed face-to-face. Key to ensuring both physical and technical comfort is the simplified and streamlined integration and adaptability of technology in the conference room. With A. & H. Meyer's range of innovative solutions, technology and media connections kick into high gear to guarantee both user comfort and satisfaction.

NETBOX
Leaf

ORGANIC SIMPLICITY, USER FLEXIBILITY

The NETBOX Leaf is a surface-mounted unit designed to optimize space and adapt to desk-sharing arrangements thanks to its compact footprint and design. A simple unit to set up and use, it is securely mounted by means of Powerstrips or a table clamp and provides durable and efficient access to power and communication outlets.

This unit can be configured with 250 modules to meet any requirements and comes hardwired with a built-in starter or connector cable of customizable length. Emblematic of modern organic aesthetics, the NETBOX Leaf features fluid lines and dynamic curves with end-caps that mimic the shape of a leaf. Choose from a fascia colour of either black or signal white.

![NETBOX logo]

NETBOX
Smart

SPACE SMART

A modular desktop unit, the NETBOX Smart is specifically designed to optimize workplace efficiency by facilitating desk-sharing setups. Easily mounted with Powerstrips, this flexible electrification solution provides direct access to power and communication connections. The NETBOX Smart can be fitted as per your requirements with a choice of 250 modules, and comes with a built-in connector cable. Clean-lined with a timeless silhouette, its profile is available in silver or champagne colour with black or white fascia.

MEB

TIMELESS CLASSIC.
BACK TO BASICS

As the original A. & H. Meyer standard socket box for power, data and voice, the NETBOX M is a functional and cost-efficient electrification solution, which is available in 2, 3, 4 or 5 gang configurations. With a detachable frame on its plastic sheath, NETBOX M can be installed and used in many settings, and can be mounted to any surface or concealed within partitions and cable trays.

For use in:

Cable Trays

Home Office

The NETBOX M is available in 2-, 3-, 4- or 5-gang configurations and in different colors.
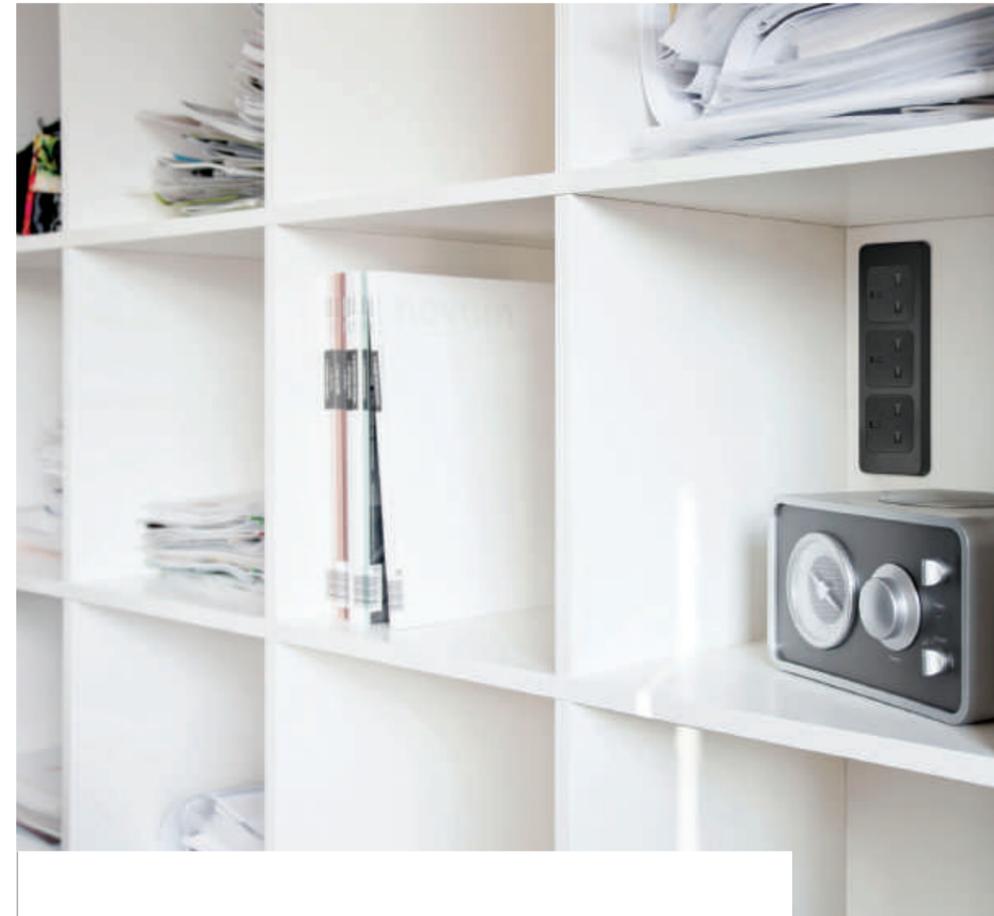

The side brackets enable the NETBOX M to be mounted to surfaces or embedded in partitions.

Daisy-chain is possible with NETBOX M.

HAVE IT
YOUR WAY

Many installations demand tiny, inexpensive outlet combinations that reduce installation time by a connector system, pre-manufactured modules and low mounting depth. The NETBOX MEB (available in 2 and 3 gang versions) has a mounting depth of only 30 mm, and come ready-to-use with a hardwired starter or connector cable. Providing particularly space-saving and unobtrusive assembly options, it can accommodate over 250 modules for power, data and multimedia connectors. Ideally suited for shop fittings, its international certification makes it a worldwide must-have for the retail industry.

Profilebox

NETBOX
Turn
Turn Comfort

Detachable plastic clamps allow the NETBOX Profilebox to be easily affixed to any surface. Special application for looping with same end-cap can be integrated.

The NETBOX Profilebox also accommodates a range of power, data, multimedia, and voice configurations, as well as protection devices.

A MULTIFACETED CLASSIC

The NETBOX Profilebox is A. & H. Meyer's most flexible system due to its highly customizable configuration as it can accept up to 35 outlet modules. This versatility allows the NETBOX Profilebox to find its place in many applications, while its functionality and uncomplicated design make it ideal for concealed installations. In addition, the unit can be customized to include surge protection, separate earth, power cleaners, switches and separate power circuits.

For use in:

Workstations

Meeting Tables

COMFORT ZONE

NETBOX Turn and Turn Comfort are A. & H. Meyer's signature built-in units. Both products rotate – manually for the former and at the touch of a button for the latter – to either reveal or conceal the socket outlets. When rotated to the "closed" position, the unit sits flush with the surface into which it is mounted. This allows for an unobtrusive surface top when the unit is not in use.

Both NETBOX Turn and Turn Comfort permit access from any angle, rendering them highly flexible solutions. As the cables run underneath the table, its sleek appearance is further enhanced, especially in table tops with a minimum thickness of 10mm. The NETBOX Turn and Turn Comfort are available in customizable lengths.

The unique click-stop mechanism secures the unit safely into position – making installation quick and tool-free!

The NETBOX Turn Comfort rotates, at a touch of a button, to expose or conceal the outlets.

NETBOX
Axial
Axial Comfort

NETBOX
Smart Tray

COMFORT
IN THE
WORKPLACE

NETBOX Axial and Axial Comfort are two built-in solutions that close flat and flush against their mounted surfaces. Accessible from the front to reveal the power, voice and data sockets as and when required, the NETBOX Axial pivots upwards while the NETBOX Axial Comfort, at a touch of a button, thanks to a spring mechanism.

As the rubber lips allow cables to travel to and from desktop devices such as computers, telephones and multimedia equipment, the units remain close even when in use. The outlets are positioned below the table surface and work best with tabletops with a minimum thickness of 10mm. Self-contained and simple to install, both units are available in customizable lengths and can accommodate the entire portfolio of A. & H. Meyer's outlets.

SMART
FIT

Keep your cables efficiently organized with NETBOX Smart Tray, an elegant cable management tool that provides easy access to your cables while keeping them out of sight.

NETBOX Smart Tray offers a choice of 4 or 5 gang modules to meet different conference room requirements. When not in use, a flip cover conceals the opening to maintain a clutter-free surface.

Designed for tables of any shapes and sizes, this under-table unit features a user-friendly compartment tray for cables. NETBOX Smart Tray is also hidden under a flip cover which is part of your table top.

The unit's unique spring mechanism allows for easy access at the push of a finger.

The click-stop mechanism renders installation speedy and effortless.

Your flip cover blends the NETBOX Smart Tray into the table-top for a clutter-free surface.

An under-table compartment keeps messy cables out of sight, out of mind.

NETBOX
Line

NETBOX
Style

ABOVE THE LINE OF DUTY

The functional NETBOX Line with its rounded curves is a classic built-in desktop solution that offers full and easy access to power, voice and data sockets. Its unique design renders the NETBOX Line slightly elevated above table level so as to protect against possible damage from liquid spills, thus keeping wires and cables safe. Along with A. & H. Meyer's unique click-stop mechanism, the NETBOX Line can be readily installed in any kind of tabletop, including glass tops. The NETBOX Line is customizable in various lengths and can be connected using a starter or connector cable. One special option is having such cables for the power supply hard wired to the unit. The NETBOX Line can also be paired with a monitor arm, which is secured by a metal bracket.

NETBOX
Spot

THE EMBODIMENT OF EFFICIENCY

Compact and classy, NETBOX Point is a Red Dot award-winning electrification unit that can be installed in furniture for seamless and secure connectivity. Whether in office spaces, libraries, hotels, airports or even at home, its unobtrusive silhouette and various color options for the cable outlet will blend well in any décor.

And thanks to its efficient and rational modular design, the NETBOX Point fits snugly, and is ideal for retrofitting into existing standard 80mm cable grommets. Even better, its nifty click-stop mechanism makes both assembly and disassembly a breeze. The NETBOX Point also features a fixed connected power cable supply and two exchangeable communication modules.

The communication modules facilitate convenient exchange among a choice of RJ45, HDMI, USB, mini jack 3.5mm and S-Video.

NETCONNECT

CONNECTING USERS WORLD WIDE

NETCONNECT is our wide range of electricity, data and audio/video cable solutions and connectors that comply with global safety standards and meet international usage standards.

Electricity solutions

Choose from starter cables with international plugs and connectors to customizable connector cables. Both starter and connector cables come in different lengths with our guaranteed safe and secure cabling.

Data solutions

Select from a portfolio of patch cords, USB cables and telephone cables for data solutions, while our audio and video solutions provide an array of VGA and HDMI cables, and many more.

A. & H. Meyer provides an extensive portfolio of starter cables that meets international safety and quality guidelines.

Connector cables are available in customized length to create daisy-chain power transmission.

A. & H. Meyer also offers a choice of male and female connectors in various colors.

Select from A. & H. Meyer's line-up of data cables for your data solution.

An array of starter cables adhering to international safety and quality regulations.

Connector cables with custom lengths for daisy-chain power transmissions.

Male and female connectors in multiple colour options.

A comprehensive line-up of A. & H. Meyer data cable solutions for every application.

NETSYSTEM

IN SAFE HANDS

Our unique selection of power distribution boxes makes for an economical, effective and efficient cable network management. Allowing for distribution of power in the system, the distribution box can be manufactured according to individual specifications of installation.

The connectors can be color-coded to facilitate easy and prompt installation while the Plug-and-Play technology provides time-saving benefits if you have to relocate or change the configuration of your installation. Used predominantly with power and lighting circuits, the various specifications of the NETSYSTEM provide flexibility and safety to meet virtually any application requirement: workstations, raised floors, suspended ceilings, small distributors, interior work, as well as container offices.

The black box is designed to distribute power into your system.

The grey box allows a larger distribution of power into your system.

The light terminal box VR comes in various options that make for a neat and tidy installation.
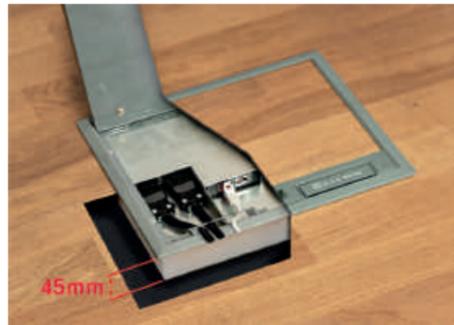

The light terminal box VR is ideal for cabling in a lighting system or workstation.

NETSYSTEM
Floor Box

REIMAGINING UNDERFLOOR POWER SOLUTION

45mm

Aesthetically pleasing and ideal for open spaces, these floor boxes are designed to efficiently distribute power, data and multimedia services in the floor where cable trunking is mounted. This means, unsightly cables can now stay concealed under the floor, ensuring a cleaner interior appearance while limiting tripping hazards. With an exceptionally low installation depth of 45mm, the NETSYSTEM Floor Box P and Floor Box PD blend seamlessly with screed flooring.

Floor Box PD offers 2 power outputs with 8 data and multimedia modules while Floor Box P comes with 4 power outputs with direct cable access for data or multimedia. The Floor Boxes also come with patented design, PI 2016701277, in accordance with stringent quality regulations.

Floor Box P
Floor Box P comes with 4 power outputs and 4 data modules.

Floor Box PD
Floor Box PD offers 2 power outputs with 8 data modules.

WHERE PRACTICALITY IS PARAMOUNT

With a selection of suitable accessories and options such as monitor arms, grommets and cable snakes, NET+ provides easy and practical solutions to any workstation covering, furniture accessory, gender changers, signal management, monitor support and other furniture hardware specifications.

CHARGE UP QUIETLY. QUICKLY. WIRELESSLY

Free yourself from messy wires and cables with ZENS PuK2 and ZENS PuK3 Wireless Chargers. These chargers leverage on the universal Qi Standard for wireless charging which works based on induction technology, offering quick, easy and convenient charging.

Equipped with a large and powerful coil, the PuK element continuously searches for device signals, charging automatically as soon as a device is placed on its surface. After the device is fully charged, the Wireless Charger shuts down automatically, entering into low-powered standby mode. ZENS PuK2 offers gradual and effective charging while ZENS PuK3 charges device with faster speed and decreases charging time dramatically.

Ideal for a wide variety of surfaces from executive desks, workstations and conference tables to home offices, hotel rooms and reception desks, both ZENS PuK2 and ZENS PuK3 can be installed easily easily on almost any surfaces except steel. Both versions come with a main adapter and comprises an aluminium body to ensure lowest operation temperature. Covers are available in black or white to suit different specifications.

Square cable grommets are available in five stylish finishes.

The wireless charging module or NETBOX Point can be mounted by means of twin grommets.

The wireless charging module features an 80mm cable grommet.

PuK2 ZENS Wireless Charger: Gradual and effective.

PuK3 ZENS Wireless Charger: Lightning-fast charging option.

The aluminium flip-up cover is offered separately to suit your storage needs.

Cables can be neatly corralled in a cable sock, thanks to Velcro fasteners.

The Cable Snake Pro is designed to lie flat on the floor while other cable snakes come in a hanging position.

Both PuK2 and PuK3 ZENS Wireless Chargers are available with black or white covers.

Personalize and brand your ZENS Wireless Chargers with assorted Partner Covers

CORPORATE HISTORY

1961 HOW IT ALL STARTED
August Meyer, a trained toolmaker and electrician, founded a small company in Dörentrup-Humfeld that delivered small plastic and metal fastenings to the regional furniture industry.

1970 THE FIRST PATENT
An all-important patent for the first plastic ball caster was applied for. Today, the plastic ball caster remains a prominent part of our logo.

1982 PRODUCT RANGE EXTENSION
Our product range was extended to include kitchen lights as well as NETBOXES for furniture. Apart from a face-lift, the products remain unchanged.

1986 A CHANGE TO REFLECT OUR GROWTH & LEADERSHIP SUCCESSION
Horst Meyer was appointed as Managing Director of the company, and our legal form and name were changed to mark the growth of a small entity into a medium-sized enterprise, A. & H. Meyer GmbH, and transition into a second-generation leadership.

1990 THE FIRST MAJOR RELOCATION
A. & H. Meyer GmbH moved into its new headquarters while maintaining our original place of business in Dörentrup-Humfeld, Germany.

1995 ISO CERTIFICATION
As a result of our international orientation and obligations toward our business partners, A. & H. Meyer GmbH was ISO certified.

2000 EXTENSION TO ASIA
Our subsidiary A. & H. Meyer Sdn. Bhd. was founded in Malaysia in order to meet the growing needs of the Asia-Pacific market.

2007 RELOCATION TO BIGGER PREMISES
To meet increased production demand, A. & H. Meyer acquired a factory in Shah Alam, Selangor. In the same year, the Malaysian subsidiary became our company's Asia-Pacific headquarters.

2010 BREAKING NEW GROUND
A. & H. Meyer Sdn. Bhd.'s 10th year anniversary in Malaysia was an eventful one, with newly designed product lines and a modernized homepage to better reflect A. & H. Meyer's commitment to the future.

2011 50TH ANNIVERSARY
The year marked A. & H. Meyer's 50th year of operations when we celebrated our golden anniversary with our clients, suppliers, employees and long-time friends, who have supported us over the years. It was also the year we were awarded the prestigious Red Dot Design Award for the NETBOX Point.

2014 A BRANCH IN BRAZIL
Buoyed by rising demand in Latin America, A. & H. Meyer went on to expand its global footprint with the opening of a new branch in Joinville, Brazil, one of the world's most dynamic economies and the region's largest.

CERTIFICATION

A. & H. Meyer's quality management system is certified according to ISO 9001:2015.

APPROVALS AND CERTIFICATIONS
To ensure our products comply with the relevant international electrical standards, we work with leading test institutes, and have earned many certifications and approvals.

EUROPE AND SIMILAR ELECTRICAL SYSTEMS
VDE: CB certification for multiple socket outlets. National certificates can be submitted on request.

UK AND SIMILAR ELECTRICAL SYSTEMS
TÜV SÜD PSB Certification TÜV Product Service: BS 5733 / BS 6396 for multiple socket outlets.

BRASIL
Certificado de Conformidade (Certification of Conformity)

USA, CANADA AND SIMILAR ELECTRICAL SYSTEMS
CSA: Certificate for Multiple Socket Outlets.
*Applicable for products made in Germany only

ASIA PACIFIC
SIRIM / ST – Suruhanjaya Tenaga Certification for Malaysia.
PSB Certificate for multiple socket outlets in Singapore, Hong Kong and similar electrical systems.

CCC Product certificate for China.

PSE & S Mark for Japan.

SASO - SALEEM product certification scheme for Saudi Arabia.

SNI Certification for Indonesia.

EASC Certificate by KTR for Korea

Certificate of compliance from Energy Safe Victoria for Australia and New Zealand.

GCC Certification for UAE, Oman, Kuwait, Yemen, Qatar and Bahrain

GENERAL PRODUCT INFORMATION
100% factory test.

All plastic parts are halogen-free and self-extinguishing in compliance with UL 94-FR.

Phase-coded connector system for 16A.

Internal wiring at 2.5mm² is possible for all products.

Information about possible colors of our products is available on request.

CERTIFICATE

The Certification Body
of TÜV SÜD Management Service GmbH
certifies that

A & H MEYER SDN. BHD.
No.3, Jalan Astaka U8/84, Section U8, Bukit Jelutong,
40150 Shah Alam, Selangor
Malaysia

has established and applies
a Quality Management System for

Assembly and Sales of
electrical components and lights for
installation in furniture and buildings.

An audit was performed, Report No. 721420224.
Proof has been furnished that the requirements
according to

ISO 9001:2015

are fulfilled.
The certificate is valid from 2018-09-14 until 2021-10-09.
