WELCOME TO AMARYLLIS

Hello and Welcome to Amaryllis!

This year, we are launching a comprehensive Amaryllis product catalogue. We have redesigned and rethought the printed Catalogue you hold in your hands, as well as future marketing materials, in pursuit of the ideal combination of innovation and synergy of shapes and designs. We are inspired by our vision to become your best friend in ventilation system. In that spirit, this edition is dedicated to providing a large number of satisfied customers through our ventilation products and services, as well as being recognised globally through our high-quality products. This edition focuses on improving our ventilation designs and architectures in order to create futuristic and elegant products, as well as how our products can be a win-win solution to various challenges that you face in your daily life in order to have fresh air. We have environment-friendly and premium designs of HVAC and ventilation exhaust fans with Accessories that ensure a better quality of life in one go on the following pages. Amaryllis products never fail to deliver on their promise of a cleaner, more efficient, and dust-free environment, thanks to a spirit of continuous innovation and a commitment to manufacturing the most modern solutions.

AboutUS

Amaryllis has been in business since 2005. Our products are designed to keep your homes, offices, public spaces, and other enclosed areas free of viruses, allergens, and pollutants, bringing about better well-being for you and your family. We have consistently improved our designs and architecture to create futuristic and elegant products that can outperform our competitors by collaborating with many notable interior designers, architects, and health experts from around the world. We at Amaryllis are dedicated to providing our customers with environmentally friendly and premium ventilation products and exhaust fans that improve their quality of life. Amaryllis products never fail to deliver on their promise of a cleaner, more efficient, and dust-free environment, thanks to a spirit of continuous innovation and a commitment to manufacturing the most modern solutions. Amaryllis exhaust fans, which range from high-speed to heavy-duty models, can be used for both domestic and commercial purposes. They are available in different varieties, shapes, and sizes, as well as premium designs, and will not break the bank. Choose a ventilation option that is appropriate for the location of installation, as each fan has unique properties. Amaryllis's solidarity and steadiness stem from its collaboration with the world's most prestigious companies. In our aerodynamics research laboratory, a dedicated team of researchers works tirelessly on challenging attributes to bring you cutting-edge products.

Ourbelief

We firmly believe that our clients deserve to be served with commitment, integrity, fairness, and opportunity. Since we need to procure our client's trust, we are committed to making health and safety a priority in our product development, not only to meet their needs and requirements but also to ensure that they carry on with a superior life. Our core business value is to create a profound bond with our customers. As a result, every action and decision we make is solely motivated by our desire to be a trustworthy supplier and an individual's best option for environmentally friendly ventilation products and kitchen appliances.

Vision

Our vision is to give an elevated degree of customer satisfaction through our products and services and be recognized globally for our high-quality products. It will attract both domestic as well as international customers, ultimately motivating our workforce to create a plethora of new solutions for our future endeavors. We aspire to be a leading corporate entity alongside the world's most recognizable green brands.

Mission

Our main goal is to provide our Indian customers with a better quality of life on par with that of the world's developed countries. We additionally plan to standardize eco-friendly and energy-saving household products for our esteemed clients.

Certification

Amaryllis always with
holds the spirits of sincerity
& all Our Products are :

- Novel in style
- Moderate In Price
- Popular by domestic and overseas clients

Wide range of products are suitable for

- Home & Office
- Café & Restaurants
- Shops & Malls
- Hotels & Resorts
- School & Collages
- Basement & Temple
- Healthcare & Hospitals
- Industrial

Why ventilation is important

Ventilation is the process of maintaining an intentional inflow of clean outdoor air into a space while simultaneously removing stale air. Every individual needs access to clean air.

Indoors, commercial, residential, and industrial spaces require proper ventilation to minimise pollutant levels, along with smart temperature and humidity control. Poorly ventilated areas can be harmful to our health. A healthy lifestyle necessitates well-ventilated homes and workplaces.

Even if you live in a busy city centre where the outside appears to be the worst, the air inside our homes can be more polluted. An effective ventilation system will aid in the removal of pollutants, viruses, bacteria, furniture aerosols, kitchen odours, moisture, and other unpleasant air particles.

BATHROOM SERIES I

1

Bathroom fans are must-have not only to manage odors but also to properly vent hot, moist air that builds up as you bathe or shower, which can lead to mold, cause corrosion to fixtures, and even damage painted and wooden surfaces.
