

Water Proof Floor Box

The Waterproof Floor Box from Connect System is a durable and reliable solution designed to provide secure power and data connectivity in environments where protection from water or moisture is essential. Built to withstand exposure to water, this floor box ensures that electrical components remain safe and functional, even in high-humidity areas or locations prone to water exposure. It features a sleek, flush design that integrates seamlessly into the floor, offering easy access to power outlets, data ports, and other essential connections while keeping them protected from the elements. Gangable for multiple units, it allows for flexible configurations to meet specific connectivity needs. Ideal for indoor applications, the Waterproof Floor Box combines practicality with robust, weather-resistant construction. Designed to endure the weight of pedestrians, it effectively protects cables from pressure and stress. Perfect for environments such as cafeterias in offices and hotels, hospitals, and other public spaces. The Waterproof Floor Box ensures seamless connectivity without compromising on safety or aesthetics.

OVERVIEW

- Rated for 220-250V.
- IP66 box for indoor.
- Panel Material: Brass alloy, Stainless steel.
- It withstands water flow at 1kg/cm².
- Fully dustproof and resistant to water.
- When connected, it can withstand the weight of pedestrians while protecting the cable from pressure and stress.
- The hinge, which opens at less than 90°, prevents the cover from being left open accidentally and causing people to trip over it.
- The top cover is completely closed when using the box.
- Available in 3 and 6 Modules.
- It can be customisable as per requirement.
- Suitable for concrete and screed flooring.

Metal Floor Box

The Metal Floor Box is a versatile connectivity solution that integrates power, data, and AV connectivity into a single unit, designed specifically for commercial environments with high foot traffic. Available in 3, 6, 10, 15, and 21 module box configurations, the floor box is constructed with a durable stainless steel, brass, or steel flap cover, capable of supporting up to 800kg, ensuring its longevity and durability in high-traffic areas. It also provides ample space inside to plug in sockets while keeping the lid closed, maintaining a safe and organized environment. These floor boxes come in multiple depth sizes to meet each customer's specific requirements. A unique feature of the Metal Floor Box is its three-sided opening for cable outlets, allowing users to plug in from any side of the box. It also incorporates a soft-closing feature, ensuring smooth and noiseless closing of the top lid. The boxes are ideal for both screed and raised floor applications, making them an excellent choice for offices and commercial spaces. Additionally, the Metal Floor Box has a design that allows the carpet to fit into a 6.5mm recess in versions with a tray lid. Overall, the Metal Floor Box provides an efficient, reliable solution for power, data and AV connectivity in commercial environments, ensuring a neat, safe, and highly functional installation.

Height Adjustable Floor Box

The Height Adjustable Floor Box is a versatile and modern connectivity solution that integrates power, data, and AV connections into a single, compact unit. Designed for use in offices, hospitals, schools, universities, public buildings, shops, showrooms, and hotels. This floor box combines functionality, durability, and aesthetic appeal. It is available in 12, 16, and 24-module configurations, providing ample interior space to accommodate connections while keeping the lid securely closed, ensuring a safe and organized environment. Constructed with a durable ABS top plate and an integrated steel understructure, the floor box is built to withstand heavy-duty commercial use. Its adjustable depth, ranging from 76 mm to 110mm, makes it compatible with both screed and recessed floors, offering seamless installation across a wide range of flooring systems. Additionally, the floor box features a recess tray lid that allows carpets or other flooring materials to blend seamlessly with the unit, creating a clean and professional appearance. The Height Adjustable Floor Box is an ideal solution for modern commercial environments with its robust construction, flexible installation options, and elegant design. It ensures efficient and organized power, data, and AV connectivity while enhancing the overall aesthetic of contemporary architectural and interior designs.
