High-quality design that makes a difference

Impress your customers with our little touches that can make a big impact on the quality of their guests' experience.

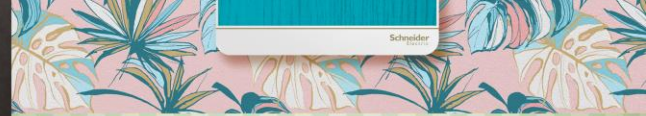

AvatarOn wiring devices are slim and elegant. Developed with a patented "Slim Rocker, Sure Click (SS)" mechanism that redefines switch aesthetics, the range's signature, frameless unitary design can match any hotel style.

It also features an overall slim profile and that creates a softer press, flutter-free switching experience, offering your customers durability and reliability.

Designed for ease of personalization, AvatarOn switches have innovative, **customizable covers** that can be removed and mounted with just one hand.

A **release indicator** makes it easy to fit the cover into place
