## Legrand EV Charging DB

3.7 kW Smart Charging Solution

A reliable and efficient EV Charging Distribution Board designed for modern electric vehicles. This 3.7 kW Legrand EV Charging DB is widely used for Tata vehicles and is compatible with other EV brands as well. Ideal for homes, farmhouses, and commercial spaces where convenient and safe EV charging is required.

## Key Features

- 3.7 kW charging capacity
- Over current and residual current protection
- Durable Legrand build quality
- Safe and reliable for daily EV charging
- Suitable for Tata EVs and other brands
- Ideal for residential and light commercial use

# Technical Overview

The Legrand EV Charging DB is engineered with precision and safety in mind. It comes with integrated protection systems and robust enclosure design, ensuring long-term performance. Internal wiring is provided for easy installation and secure operation.
